

Privacy Policy

Itqan Wedding Planner for iOS · Effective April 22, 2026 · Version 1.1

Summary

Itqan is an offline wedding and event planner. We operate no servers and use no third-party analytics. We do not collect, transmit, or share your personal information. Your plans, budgets, and attachments — plus on-device diagnostic files used only for crash reporting — stay on your device.

Data We Collect

Itqan has **no servers**, no accounts, no login, no sign-up, and no telemetry back-end. We do not collect, transmit, or store any of your personal information on any infrastructure operated by Itqan. The app does create a small set of on-device diagnostic files (see *Diagnostics* below); those files never leave your device through Itqan.

All data you enter — events, budget categories, line items, amounts, dates, notes, and any attached files (receipts, contracts, photos) — is stored only on your device in the app's private container.

Diagnostics

Itqan uses Apple's MetricKit framework to receive on-device crash reports and performance metrics for the app. Typical contents include crash stack traces, hang detections, launch/CPU/memory/battery traces, and app responsiveness signals. These reports are written only to the app's private on-device storage (a "crashes" folder inside the app container). They are **never transmitted off your device by Itqan**, and are retained only so that you can attach them to a support email if you choose to report a problem.

Diagnostics collection defaults to **on** and can be disabled at any time from *Settings* → *Diagnostics* inside the app. Separately, iOS gives you control over whether your device shares anonymous crash analytics with Apple through *Settings* → *Privacy & Security* → *Analytics & Improvements*; that is an Apple-controlled setting and operates independently of Itqan.

Subscriptions and Purchases

Itqan offers an optional auto-renewing subscription ("Itqan Premium") with Monthly (\$4.99 USD per month) and Yearly (\$29.99 USD per year) options, or the local-currency equivalent as determined by Apple. A 7-day free trial is available on the Yearly plan. Subscriptions are processed by Apple through the App Store using StoreKit. Payment is charged to your Apple ID at confirmation of purchase. Subscriptions auto-renew for the same period at the same price unless cancelled at least 24 hours before the end of the current period. You can manage, downgrade, or cancel your subscription at any time from *Settings* → *[your name]* → *Subscriptions* on your Apple device.

If you start a free trial, you will not be charged during the trial. To avoid being charged, cancel the subscription at least 24 hours before the trial ends. No refunds are provided for partial subscription periods; refund requests are handled by Apple under Apple's standard refund policy.

Itqan does not receive your payment details. We receive only the anonymized transaction receipt that Apple provides to validate subscription status on-device. This receipt does not include your name, email, credit card number, or billing address.

Data Storage and Security

All data is stored locally on your device using iOS's standard sandboxed app storage. If you enable iCloud Backup on your device, your data is included in encrypted iCloud backups managed by Apple; we have no access to those backups. Itqan does not operate any cloud sync, CloudKit database, or third-party backup service.

Export and Portability

Itqan lets you export your plans as JSON (free tier) or as a formatted PDF (Premium). Exported files are shared via the standard iOS share sheet and go only where you direct them. We do not receive a copy.

Children's Privacy

Itqan is not directed at children under 13 and does not knowingly collect any information from children. If a parent or guardian becomes aware that a child has provided information through the app, they may remove it at any time from *Settings* → *Erase All Data*.

Your Rights Under GDPR (EEA, UK)

Because Itqan does not process personal data on any server, GDPR data-subject rights are exercised entirely on your device: you can view, edit, export (as JSON or PDF), and permanently erase all of your data at any time from *Settings* → *Erase All Data* inside the app, or by deleting the app. You retain the right to lodge a complaint with your local data-protection supervisory authority if you believe your rights have been infringed.

Your Rights Under CCPA / CPRA (California)

For the purposes of the California Consumer Privacy Act and California Privacy Rights Act, Itqan does not collect, use, disclose, sell, or share any categories of personal information as defined by those statutes. Because no personal information is collected, Itqan has no data to disclose, delete, or opt out of selling. The "Do Not Sell or Share My Personal Information" right does not apply as we do not sell or share personal information. Payment information provided to Apple for App Store purchases is governed by Apple's privacy policy, not Itqan's.

Third Parties

The only third party involved in Itqan is Apple, for payment processing and app distribution. Apple's handling of your information is governed by Apple's Privacy Policy at apple.com/legal/privacy.

End-User License Agreement

Itqan Premium is licensed under Apple's Standard End User License Agreement, available at apple.com/legal/internet-services/itunes/dev/stdeula.

Governing Law

This Privacy Policy is governed by the laws of the country or U.S. state in which you reside at the time your account is created, without regard to its conflict-of-laws rules. Mandatory local consumer-protection laws always apply where they provide you stronger rights. If you reside outside a jurisdiction with an applicable local law, this Privacy Policy is governed by the laws of the State of California, United States.

Changes to this Policy

If this policy changes, the updated version will be posted at the same URL with a new effective date. Material changes will also be surfaced in the app's Settings screen.
